

## Topics for Submission

Fluorine - Basic  
Chemistry/Applications  
Bromine - Basic  
Chemistry/Applications  
Iodine - Basic  
Chemistry/Applications  
Iodine – Commercial  
    Considerations  
Astatine - Basic  
Chemistry/Applications  
Radiohalogen Production  
Peptide/Protein Labeling  
Auger Therapy  
Biomolecules  
Gene Therapy/Aptamers  
Neurotransmission  
Clinical Evaluation/Implications

## Deadlines

**Abstract Submission—June 1, 2012**

**Early Registration—July 1, 2012**

## Purpose and Scope

The purpose of the meeting is to provide a scientific forum for presentations and discussion of topics related to all aspects of radiohalogen research. Topics to be included are production, radiolabelling chemistry, and applications such as imaging and therapy. Implications of using radiohalogens, such as  $^{124}\text{I}$  and  $^{76}\text{Br}$  in imaging will be discussed. The meeting is intended to be small (<100 attendees) with both oral and poster presentations, as well as educational workshops with adequate discussion time.

## Location and Accommodations

The symposium will be held in beautiful Whistler B.C., Canada (Venue of the 2010 Winter Olympics). Whistler is a scenic two-hour drive from Vancouver International Airport via the Sea to Sky Highway, and is also accessible by bus, train, and taxi/limousine.

Accommodations will be at the Hilton Whistler Resort and Spa, located in the heart of the village, within walking distance to all amenities. The meeting rooms will be at the Telus Whistler Conference Centre, just steps away from the hotel.
